

TESTIMONIAL

Mads Bedholm **Laursen**

26-06-2021

In the period 15-09-20 to 30-06-20, Mads has participated in the main course - Together we go on the field. The purpose of the course is to uncover personal talent with the goal of achieving personal success. The course focuses on personal development and the team's prerequisites for success individually and as a team.

Throughout the period, Mads has shown courage and has specially developed in the field of social skills. At the beginning of the course, Mads has shown great competencies in graphics and editing. Later in the course, Mads has shown both discipline and the ability to learn new things in the work with graphics and setup. In the period leading up to the end, it is particularly noticeable that Mads has shown tolerance, self-insight, and a willingness to cooperate to succeed together with others.

I experience Mads as a friendly and committed person who wants to move forward and who has a lot to offer in terms of graphics and editing. I wish Mads all the best of luck in the future.
